DESIDERATA 2017

Convention sur la Diversité Biologique

Suite à la Convention signée à Rio de Janeiro en 1992 sur la Diversité Biologique, les Jardins botaniques doivent respecter l'article 15 concernant l'accès aux ressources génétiques.

Dans le respect de cette Convention, le Jardin Botanique de l'Université de Strasbourg s'engage à ne distribuer ses graines qu'aux institutions et jardins respectant les conditions suivantes :

1. Le matériel végétal est utilisé seulement pour l'intérêt commun, particulièrement pour la recherche scientifique, l'enseignement, la conservation des espèces et le développement de collections botaniques reconnues.
2. Toute commercialisation du matériel génétique envoyé doit faire l'objet d'une demande de permission au Jardin botanique de l'Université de Strasbourg. Nous considérons la commercialisation comme n'importe quelle utilisation économique de résultats scientifiques.
3. Toute publication scientifique sur le matériel génétique fourni doit être envoyée automatiquement au Jardin botanique de l'Université de Strasbourg en le citant comme origine.

Toute commande de graines au Jardin botanique de l'Université de Strasbourg implique le respect des conditions citées ci-dessus.

Convention on Biological Diversity

Since the endorsement of the Convention on Biological Diversity (Rio de Janeiro, 1992) Botanical Gardens have to comply with article 15 (access to genetic resources), particularly concerning the annual seed-exchange.

In consideration to the Convention, the Botanical Garden Strasbourg University gives plant material only to those who use it according to the Convention. Seeds from this catalogue are distributed only under the following conditions :

1. The plant material is used only for common good, especially for scientific research, education, species conservation, and the development of recognized plant collections.
2. If the purchased material is used commercially written permission must be obtained from the Botanical Garden Strasbourg University. We consider commercialisation as any economical use of scientific results won by plant material or its derivatives.
3. We request that any publications resulting from the use of our plant material is supplied to us and that we receive a copy of the publication.

By ordering seeds or plant material from Botanical Garden Strasbourg University, the recipient accepts to respect all the above conditions.

We accept the agreement of the Convention on Biological Diversity (CBD, Rio de Janeiro 1992)
